

NutriClub

Introduction

NutriClub overview

NutriClub is a science-backed nutrition brand building a scalable health and nutrition lifestyle ecosystem for India, focused on clean, gut-friendly formulations for daily use.

The company operates two core product lines: **CARE**, a personalized daily functional nutrition range, and **COMPLETE PROTEIN**, a high-performance protein range designed for superior digestibility and integrated micronutrition.

Built on proprietary formulations and IP-protected processes, NutriClub is designed for mass adoption with strong unit economics and long-term brand defensibility.

Problem statement

The problem and opportunity.

This creates demand for trusted, gut-friendly, personalized nutrition at scale.

Nutrition deficiency

Over 75% of Indians lack adequate daily protein and essential micronutrients.

SIBO & digestibility issue

High-carbohydrate diets and poor protein quality lead to bloating, gut distress, and low absorption.

Market confusion

A fragmented market forces consumers to choose familiar but nutritionally poor options.

Low-quality protein

Why causes intolerance for many users; plant proteins often lack taste and bioavailability.

Our science backed and IP protected solutions

01

Science-Backed Formulation

Personalized nutrition designed to meet daily protein and micronutrient needs.

02

Gut and Digestive support

Proprietary enzyme blends (DYNZYM®, GUTDOX®) for better digestion and reduced bloating.

03

Personalized Products

Tailored by age, gender, lifestyle, and use-case.

04

IP-protected Innovation

Proprietary extraction, formulation, and manufacturing methods for taste and bioavailability.

Care Range

Functional Nutrition Powder tailored by age group, genders, use case.

(Price: 449-549/400gm pack with 40-60% GM)

Features

1. Every NutriClub Care daily functional nutrition powder specially designed by age group, gender, and lifestyle.
2. 100% plant-based protein with essential micronutrients
3. Digestive enzyme blend (DYNZYM®) and gut-support formula (GUTDOX®)
4. Soya-free, lactose-free, allergen-free, zero added sugar

Complete Protein Range

(Price: 1,699-2,999/1kg pack with 45-70% GM)

Source: Mobbin

Features

1. High-performance protein with integrated micro-supplements.
2. 24g protein per serving with BCAA, creatine, multivitamins, Omega-3/6/9
3. Enhanced digestibility and clean taste
4. Suitable for regular training and performance use

Innovation

Innovation & IP

From Day One NutriClub has been built for deep innovation

Innovative plant protein

High-quality plant protein extraction improving taste, mixability, and bioavailability

Personalized products

Personalize & Science backed formula that provide 100% your daily nutrition needs in a simple, clean and tasty format.

Gut & digestive support

Proprietary digestive enzyme systems (DYNZYM®, GUTDOX®) targeting gut health and absorption

IP protection

IP protection through formulations, processes, and trade secrets

Flavor masking techniques

Flavor-masking techniques for clean, consistent taste

Complex formulation

Complex multi-ingredient formulations that are difficult to replicate

Market Opportunity

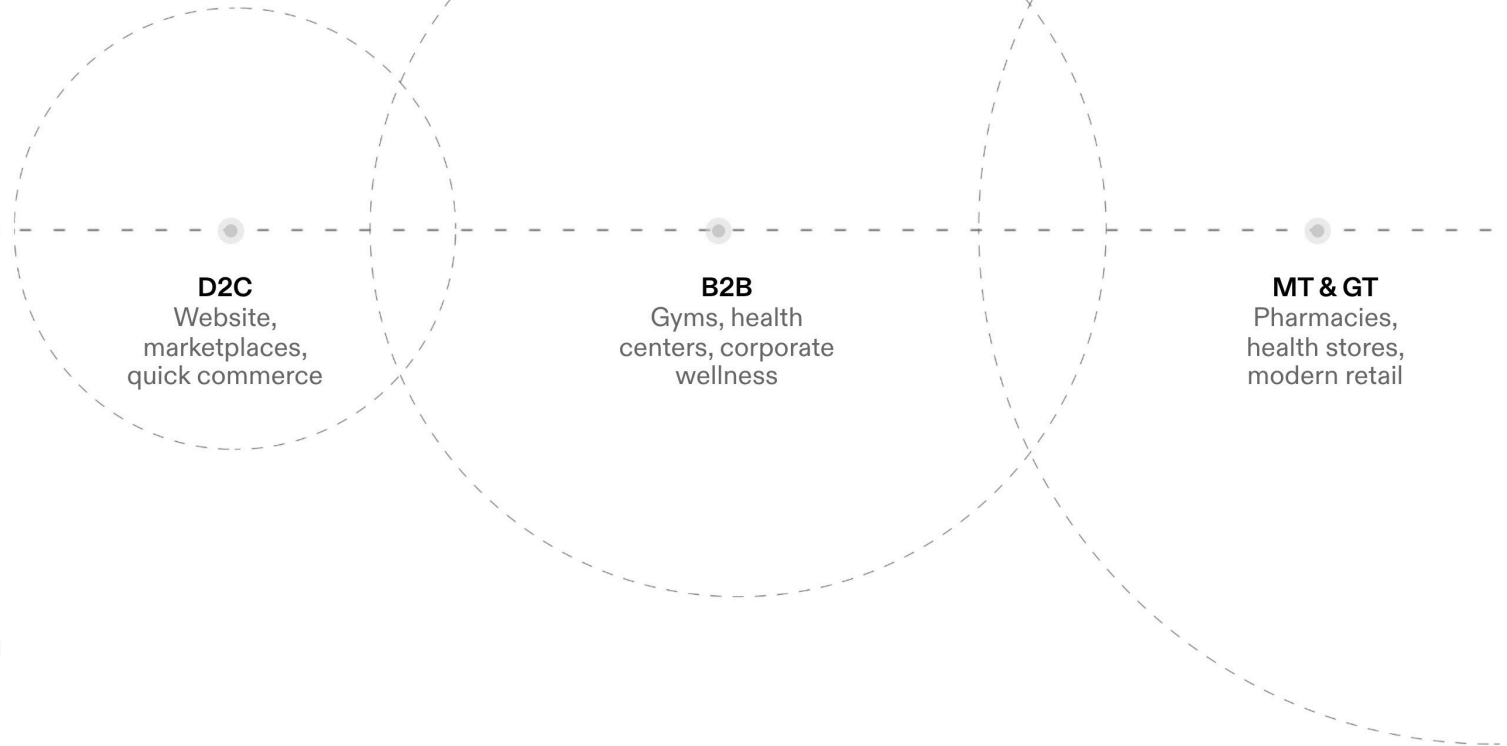

Market size TAM-SAM-SOM breakdown of the market opportunity

Market Opportunity

Business Model

The multi-channel sale and distributions strategy

The NutriClub follows a multi-channel distribution strategy to balance margin, scale, and reach.

Project plan

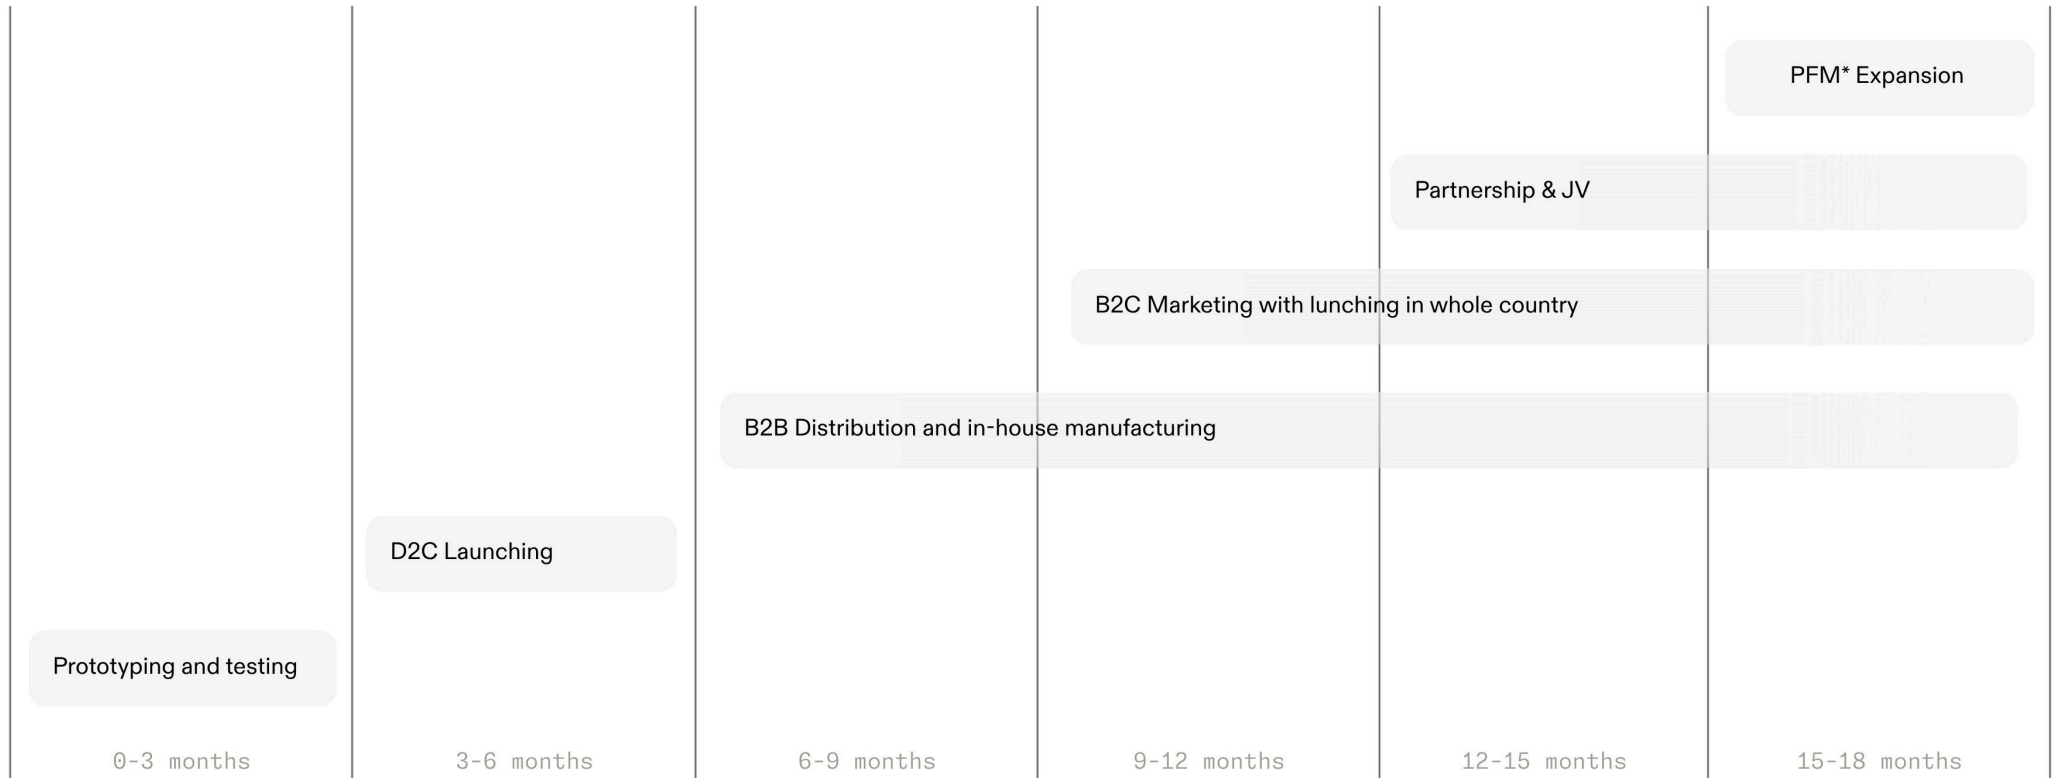

18-Month Execution Roadmap

0-3 months: Final formulation, prototyping, testing

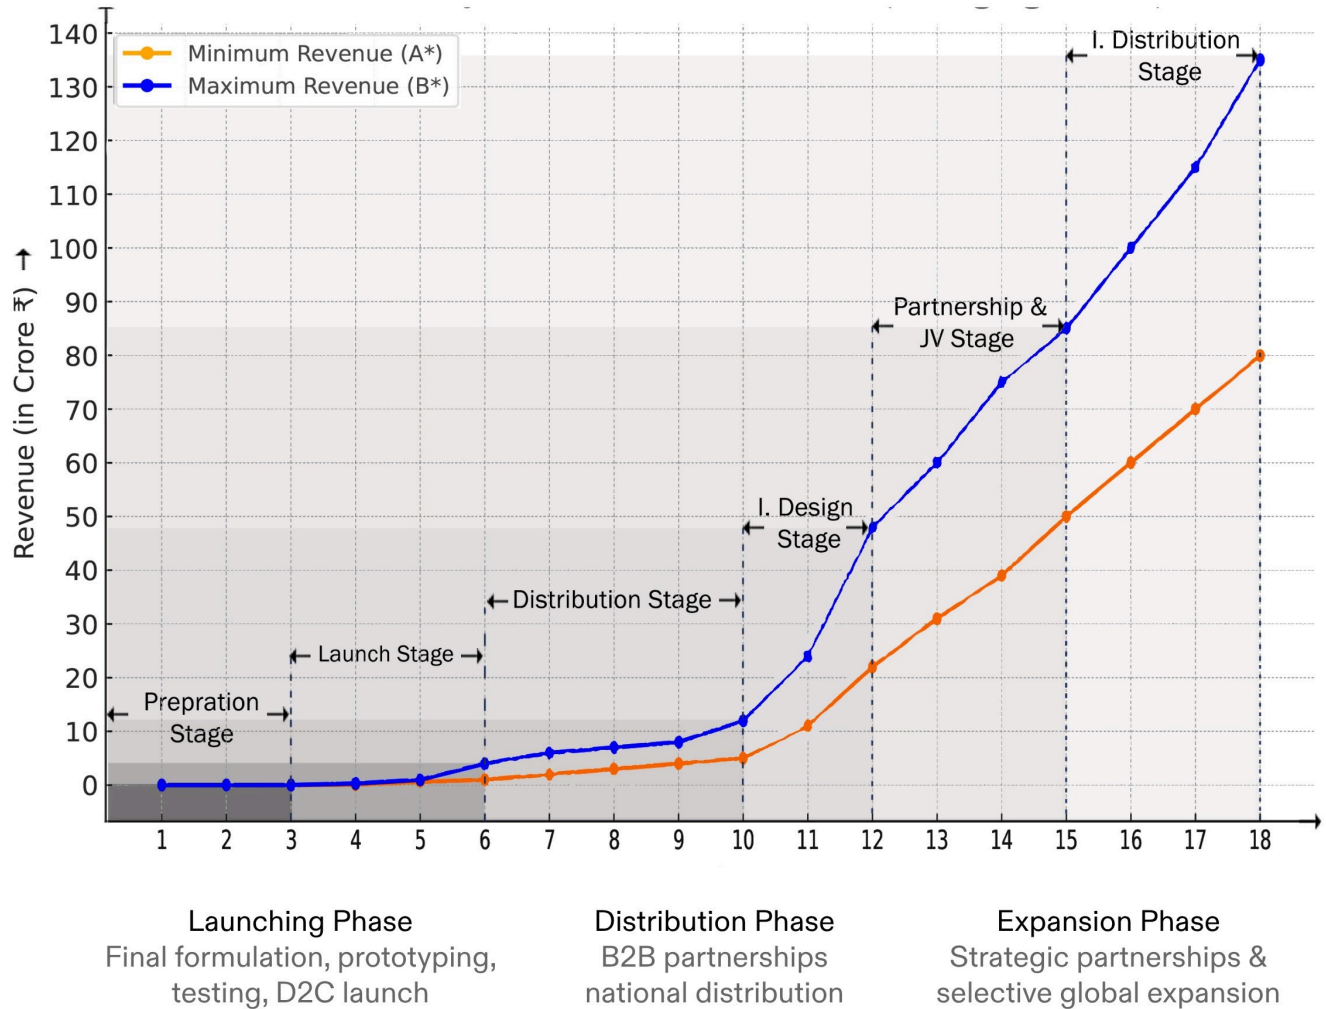

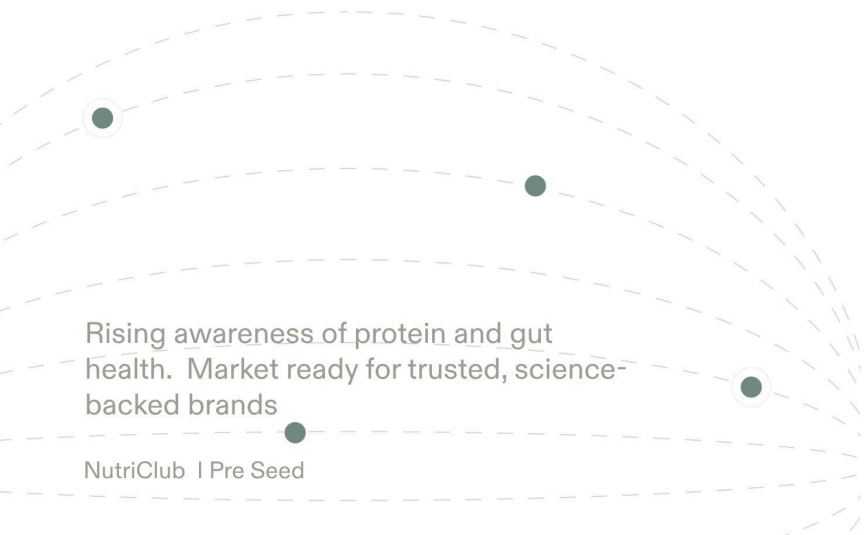

3-6 months: D2C launch, early B2B partnerships

6-12 months: In-house manufacturing, national distribution

12-18 months: Strategic partnerships & selective global expansion

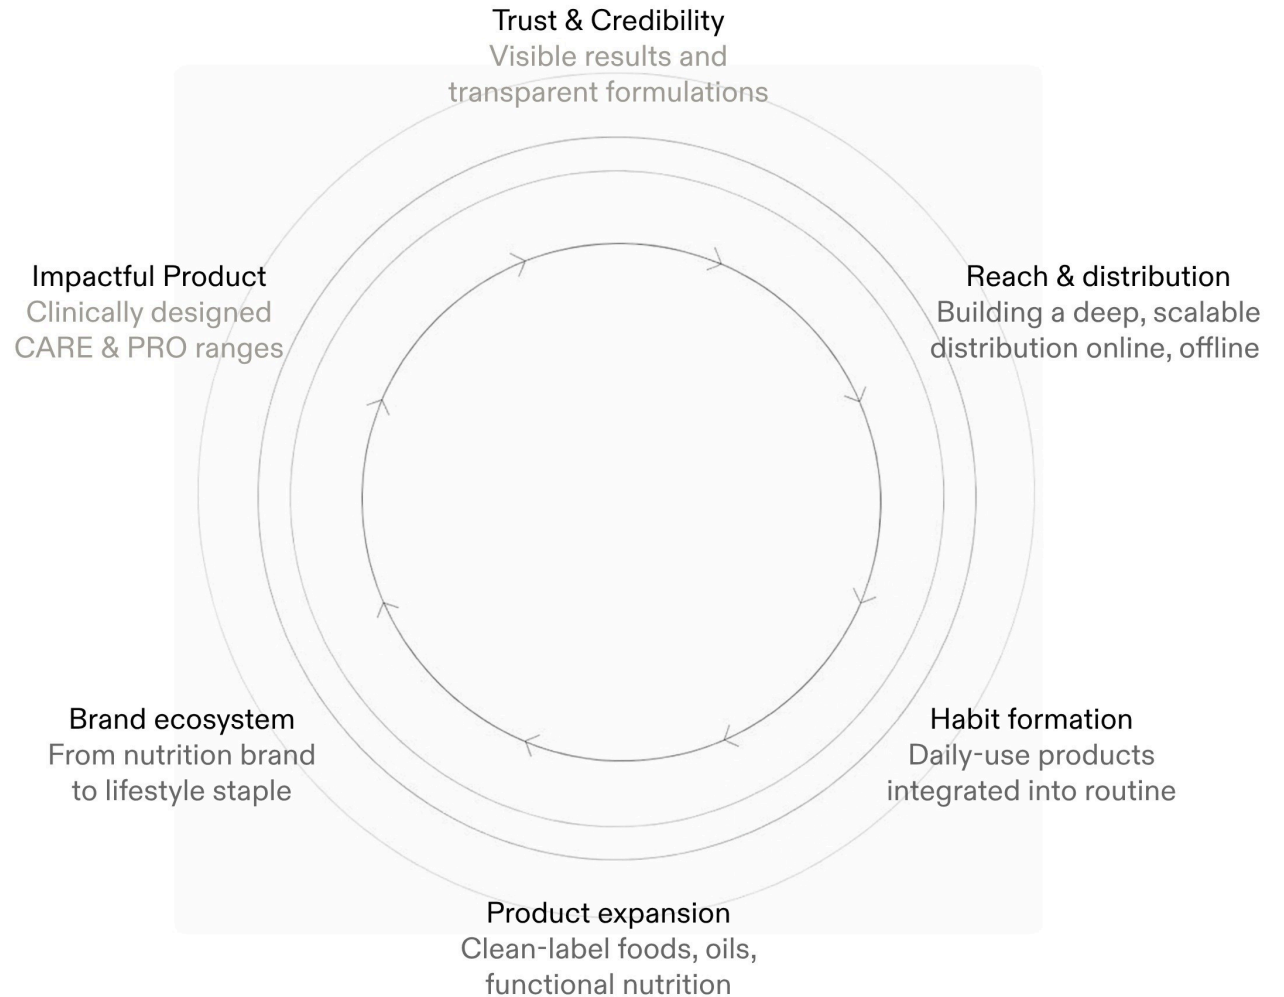

Why now Shift from generic supplements to clean, functional nutrition

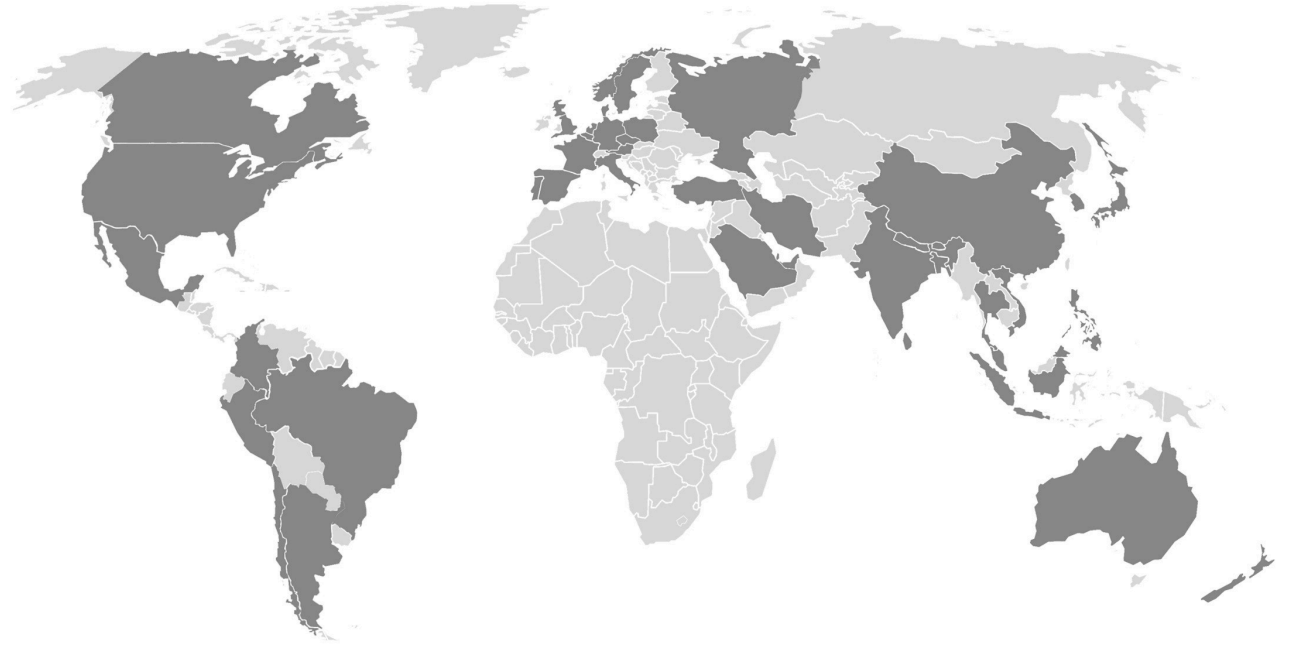

Competitive Advantage

Credibility loops to create nutrition and healthy lifestyle ecosystem

Global market Geographies we want to target

4.2B+

Potential users
